

Demystifying CPSC Deadlines

This diagram was developed to help you plan curriculum development and/or revisions in order to comply with CPSC policy related to student registration and to meet established catalog deadlines. The left side of the diagram illustrates when course revisions and new course proposals must be approved by CPSC in order to be implemented for a specific semester. The right side of the diagram illustrates when program/certificate revisions and proposals need to be approved by CPSC in order to be changed for the upcoming Fall semester and beginning of the academic/catalog year. When submitting proposals, please remember it may take up to two months for a proposal to be approved through the CPSC process.
